CENTRIX INFOTECH & ENGINEERING

INTRODUCTION

COMPANY OVERVIEW

Centrix Infotech & Technology specialises in offering complete IT solutions to companies of all sizes. In addition to providing on-site technical support, we also provide remote support, computer rentals for office use, software development, hardware and software supplies, website and email hosting, networking (LAN, MAN, and WAN), security and access systems, sophisticated CCTV surveillance systems, and server and workstation setup for both Linux and Windows.

We are dedicated to assisting our clients in achieving their goals and maintaining their competitiveness in the modern digital environment with the support of our team of skilled professionals and cutting-edge technology. To find out more about how we can help your company, get in touch with us right away.

“ ...dedicated to assisting our clients in achieving their goals and maintaining their competitiveness in the modern digital environment... ”

CENTRIX INFOTECH & ENGINEERING

OUR FOUNDER

BACKGROUND & EXPERIENCES

Kumar Perumal, the visionary founder of Centrix Infotech & Engineering, established the company in 2009 with a clear focus on providing exceptional IT, CCTV, Digital Security, Networking, and Electrical Engineering services. Under Kumar's exceptional leadership, Centrix Infotech & Engineering has quickly emerged as a renowned leader in the field, renowned for its cutting-edge solutions and unparalleled commitment to customer service.

Kumar's passion for technology and engineering is palpable in every aspect of the company's growth and success. He remains dedicated to staying at the forefront of industry advancements and consistently incorporating the latest technologies into Centrix Infotech & Engineering's offerings. His unwavering pursuit of excellence is reflected in the satisfaction of the company's clients and the unwavering loyalty of its employees.

With Kumar at the helm, Centrix Infotech & Engineering is poised for continued growth and prosperity in the years ahead. His visionary leadership, combined with a team of talented professionals, ensures that the company will remain a driving force in the IT, CCTV, Digital Security, Networking, and Electrical Engineering sectors.

CENTRIX INFOTECH & ENGINEERING

OUR SERVICES

BUSINESS NATURE

SALES & SERVICES OF IT AND CCTV

At Centrix, we specialize in providing top-notch IT and CCTV services to businesses of all sizes. Our team of highly trained and experienced technicians are experts in all areas of IT, including network setup and maintenance, software installation and troubleshooting, and data backup and recovery.

Additionally, we offer state-of-the-art CCTV solutions that allow businesses to keep an eye on their property and assets at all times, ensuring maximum security and peace of mind. Whether you're in need of IT support for your growing business or looking to upgrade your security system, Centrix has you covered.

ON-DEMAND SUPPORT

Centrix offers dependable, 24/7 IT support. Although the cornerstone of our service is preventative maintenance, unanticipated IT problems and emergencies are unavoidable.

Fortunately, Centrix's knowledgeable staff is always on hand to offer assistance. Quickly resolving these problems shields your company from disruptions and lost productivity. Depending on the size of your company and the complexity of your network architecture, an IT support team of two or more engineers will be given to you. The skill set of your staff will be carefully matched to your IT environment.

Centrix also offers remote IT help to make this procedure even more practical. Your attention may be on your company and its primary objective once you are free from having to worry about IT-related problems.

OUR SERVICES

BUSINESS NATURE

COMPREHENSIVE SERVICES

For daily operations, successful firms rely on a variety of technologies. Any hardware, software, and network systems in your office can receive IT help from Centrix. Setup, maintenance, and upgrades for Internet services, VOIP (Voice over Internet Protocol), computers, and network systems are typical areas that we service. We additionally offer services like data migration, security, and backup.

We can deliver the precise services and labour that your company need thanks to a personalised service and maintenance contract. As a consequence, you can focus more of your time and energy on growing your business rather than worrying about IT issues.

PREVENTING POTENTIAL IT PROBLEMS

At Centrix, our service and maintenance contracts are approached with the intention of averting any IT problems. The secret to prevention is to offer managed, proactive IT services. To ensure that IT issues are kept to a minimum and never stop business operations, we work to keep your networks, servers, and other systems operating effectively at all times. As a consequence, you'll gain time and boost your company's production.

SEAMLESSLY INTEGRATE NEW TECHNOLOGY

The technology that your company needs to use to succeed in your industry is always evolving. You will need to routinely incorporate new technology if you want to scale your organisation effectively. New technology, software, or security measures may be part of this. Your company's critical systems will remain effectively integrated and maintained with a service and maintenance contract from Centrix, preventing any downtime during regular business hours.

OUR SERVICES

BUSINESS NATURE

DATA SECURITY AND PROTECTION

Data security is a major concern in contemporary company operations. Data breaches are a risk that is greater than ever and can be harmful to any business. Effective data security implementation and maintenance can lower the risk of compliance and security issues while also securing customer and corporate data.

Paying close attention to the storage and security of your data also aids in preventing the loss of crucial data. At Centrix, our knowledgeable staff strives to pinpoint security risks or opportunities for development, handle issues swiftly, and avert further issues. Our proactive approach to IT services helps us do this.

AFFORDABLE, PREDICTABLE MONTHLY COSTS

Due to our growing reliance on computers, network infrastructure, and servers, the majority of organisations utilise equipment that needs specialised IT upkeep. However, it can be costly to hire a full-time person for IT assistance. A full-time IT employee has associated salary and benefit costs.

This is not a workable strategy for many firms. An IT service and maintenance contract can be customised with Centrix to fit your company's demands, IT requirements, and spending limit. As a result, the monthly cost for on-demand IT help is reasonable and predictable.

CENTRIX INFOTECH & ENGINEERING

OUR SERVICES

BUSINESS NATURE

ENGINEERING

Centrix is committed to delivering exceptional electrical and general engineering services that meet the diverse needs of our clients. Our team consists of highly skilled engineers and technicians who possess extensive experience in various electrical and general engineering projects. From new installations to repairs, maintenance, and upgrades, we have the expertise to handle projects of any scale with utmost professionalism.

At Centrix, we prioritize safety, efficiency, and quality in all our work. We leverage the latest technology and equipment to ensure that every project is executed with precision and adherence to the highest industry standards. Whether you require assistance with a specific project or ongoing support for your business, Centrix is dedicated to helping you achieve your goals by providing reliable and top-quality electrical and general engineering services.

Trust Centrix for all your electrical and general engineering needs. Our skilled team is ready to collaborate with you, offering tailored solutions and expertise that exceed your expectations. Experience the excellence and reliability that Centrix brings to every project, and let us contribute to your success.

OPERATING PROCEDURES

PLANNING & ORGANIZING

In order to attain these goals and objectives, our team will begin by setting them, coming up with methods, and formulating a plan of action. In order to complete the mission, the team will then coordinate by distributing resources like persons and equipment.

CONTROLLING & DECISION MAKING

To make sure the business is accomplishing its goals and objectives, this entails tracking performance, making modifications as necessary, and taking corrective action. Making decisions based on the knowledge and data at hand is what this procedure entails.

CORPORATE PHILOSOPHIES

COMMITMENTS & DEDICATIONS

We believe in sincerity, honesty and accuracy of promises.

We strive to attract, train and retain our staff at all levels.

We always strives to maintain the reputation and good name of the company.

We hold fast to professionalism and credibility through pride and dedication our employee.

We are committed to the satisfaction of our customers.

We believe in the concept of teamwork, harmony and loyalty.

We will carry out work with full dedication, efficiency and produce high quality and satisfactory work with a full sense of responsibility.

We are trying to realize the atmospheric cares for each other and offers the value of attractive work rewards as well as giving a constant compensations.

We operate nationally and internationally.

We are always looking for opportunities and trying out the latest technology.

We believe that our employees are our most valuable assets.
